

First Aid at Mitchell Community College

Mitchell Community College provides first aid kits for minor emergencies in all of its buildings. These kits are stocked with basic first aid supplies and are equipped to treat minor injuries that occur throughout the semester on campus. The kits include adhesive bandages and ointment for minor cuts, scrapes and burns. The first aid kits are not available for self-treatment or public use.

Advise your instructor of your injury and first aid need and he or she will assist you or notify security to assist you. If your injury requires more than basic first aid, you will be directed to see your doctor or visit an emergency clinic or Iredell County EMS will be notified via 911.

Should a true emergency occur on campus, notify 911 first, and then notify security.
